“Start where you are. Use what you have. Do what you can.”

About

Robotics researcher primarily focused on enabling technologies for physical human-robot collaboration. Strong theoretical background in robot kinematics, dynamics and control, and thorough practical experience with robots of different complexity ranging from manipulators to humanoids. Experienced in system integration of complex software and hardware systems.

Experience

Postdoctoral Fellow

Dynamic Interaction Control

- Developer - iFeelYou Bracelet COVID19 social distancing team

2020 - Present

IIT, Italy

Early Stage Researcher & Doctoral Fellow

Dynamic Interaction Control

- Core Developer and Maintainer - Human Dynamics Estimation v2.0 Library
- Experience in Humanoid Whole-Body Control
- Competence in Robot Simulation
- Open Source Contributor - YARP, iDynTree, GazeboYarpPlugins, Wearables
- Seasoned in Agile Software Development & Research Methodologies
- Engaged in European Research Projects - An.Dy, PACE
- Facilitated Technology Transfer

2016 - 2020

IIT, Italy

Master Thesis

Event-Driven Perception for Robotics

- Bio-inspired optical flow estimation and vergence control with neuromorphic stereo vision system on iCub [C7]

Mar - Sep 2015

IIT, Italy

Graduate Research

EMARO Lab

- Gesture recognition through wearable sensors for human-robot interaction [W6]
- AND-OR graph library for task planning during human-robot collaboration

Jan - Mar 2015

Genova University, Italy

Teaching Assistant

EMARO Lab

- Developer of Pan-Tilt setup for teaching Software Architecture using ROS

Jul - Sep 2014

Genova University, Italy

Automation Engineer

Madras Rubber Factory Ltd.

- Commissioning and Maintenance of Tyre Manufacturing Machines

2011 - 2013

Pondicherry, India

Doctoral Research

My doctoral research is aimed at addressing some of the research challenges to enabling human-robot collaboration. In particular, I worked on a holistic human perception framework for real-time monitoring of whole-body human motion and dynamics, to communicate human partner's intentions and needs in real-time to a robot partner for successful realization of a collaborative task [W2, C2, C1, U1]. Furthermore, I worked on the challenge of leveraging assistance from a human partner to improve human-robot collaboration. In this direction, an attempt at methodically defining what constitutes an assistance from a human partner is investigated and proposed partner-aware robot control strategies to endow robots with the capacity to meaningfully engage in a collaborative task [C3, C4, C6].

Education

PhD, Human-Robot Collaboration

Italian Institute of Technology (IIT)

2016 - 2020

Genova, Italy

MSc, Advanced Robotics

University of Genova

2014 - 2015

Genova, Italy

MSc, Robotics Engineering

École Centrale de Nantes

2013 - 2014

Nantes, France

BTech, Electrical Engineering

Pondicherry University

2007 - 2011

Pondicherry, India
